## **Education**

- American Intercontinental University/Regents University London  
BA in Design and Photography  
BA in Visual Communication  
Alchemea Audio School  
Certificate in Audio Engineering

## **Work Experience**

### Catering assistant at Ari Bhod, Tehachapi, California

Preparing food for events with diverse dietary requirements. Vegan, vegetarian, gluten free.

### Het Pakhuis, Haarlem,

All round kitchen man, mise-en-place, cold section during service, desserts and dishwashing. Small team, busy restaurant, many responsibilities.

Freelance audio engineer/producer with many ties to the live scene in Haarlem. Can book and promote musical acts of a wide variety as well as consult on creating live music spaces. Can also provide live sound services, so no external sound engineer need be hired.

I enjoy the atmosphere of a kitchen and like the typical kitchen tempo when I am working. I don't mind doing dishes when it's needed, or cleaning when there is a moment to spare. My favourite task is fulfilling mise-en-place lists and encouraging my colleagues to be motivated with humour and a positive attitude. I have a good sense of seasoning with food, and am picky myself when it comes down to how it tastes. I'm easy to work with and good with people. I can make Indian and pan-Arabic dishes with some measure of authenticity, having been raised in that part of the world. I also learned some Mexican styles during the time I lived in California.

**Speaks** English, Arabic, understands a lot of Dutch but still learning to speak it.

**Abilities in** photography, graphic and general visual design. Writing.

**Hobbies and interests** Performing live music, reading, learning new skills (coding, kitchen skills, languages and improving my business acumen).
